

CANADIAN Electric Vehicles Ltd.

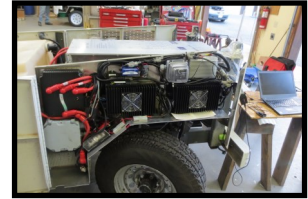

Electric conversions for Zamboni® 400 and 500 series

Complete repower systems that can extend the life of your current fleet and offer a cost effective way to reduce harmful emissions. Our systems completely replace the fuel engine eliminating all carbon monoxide/dioxide production. Go green and clean the air for a safer working environment for your staff and more pleasant experience for arena patrons with the added benefit of substantially reduced operation/maintenance.

Zamboni® 400 Series

Zamboni® 500 Series

- Convenient on board charging system plugs into standard EV charging stations.
- AC motor / controller drive systems with solid reputation for reliability in the industry.
- Operator controls do not change for easy transition with minimal retraining required.
- Cleaning performance does not change. Machine has the same power and performance.
- No more propane cylinders to fill and store... just plug it in. No oil changes!
- Safe lithium battery system with onboard battery management system. WiFi connected!
